

Magnum Diesel Leads the Industry in Updates and Product Design Improvements for Critical Engine Applications

At Magnum Diesel Parts, we recognize the importance of monitoring product updates from the Original Equipment Manufacturers. After All... An OEM may be the first to identify or recognize a specific problem with their product through Warranty or Performance issues.

At Magnum we are constantly monitoring product revisions and updates from Original Equipment Manufacturers, along with reported problems from other leading industry sources. At Magnum we know the importance of producing the best quality product possible for the application.

When it comes to updating and developing new and improved products, Many gasket suppliers are quick to tell you that they are leaders in the industry... *Truth Be Known... Magnum Diesel Products has been the Leader in Providing Updated Products To This Industry...* for some time now.

Since the inception of Magnum Diesel, we have been the first to develop and release many important product improvements to the industry..... Just one of the reasons that Magnum has become the standard that other "old line" suppliers now follow...

Listed below are a few of the recent product improvements from Magnum Diesel for use on Caterpillar® Engines:

Misc. Engine Applications

4P3977 – Polymer coated Graphite Air Compressor cyl. head Gasket (release date 6/06) For Bendix Tu-Flo 550 and 750 Air Compressors. Provides a very reliable, high quality, long term seal.

6V0128 – Hi-Temp Silicone EUJ wiring harness seal (release date 10/04)

3306 Series Engines

1694199 – Single piece Oil Pan Gasket (release date 4/04) (replaced 8S1965)

1694200 – Single piece Oil Pan Gasket (release date 4/04) (replaced 4M2969)

Single piece pan gaskets prevent oil leaks and provide ease of assembly. Puzzle type gaskets may provide leak paths at dove tail joints.

3400 Series Engines

2300940 – HEUI Valve Cover Seal (release date 4/04)

High quality HNBR rubber molded seal with enhanced installation & sealing design.

1102220 – Cylinder liner O-ring (release date 10/03)

1426217 – Cylinder liner O-ring (release date 12/03)

1427072 – Cylinder liner O-ring (release date 11/03)

High quality USA manufactured components of HNBR, EPDM, and Viton compounds providing excellent sealing.

3500 Series Engines

2067030 – HNBR molded Valve Cover seal (release date 11/04)

2082362 – HNBR molded Push rod side cover seal (release date 11/04)

2082364 – HNBR molded Valve Cover seal (release date 3/05)

2082363 – HNBR molded Side Cover seal (release date 8/06)

1073758 – Molded Viton Aftercooler seal (release date 4/06)

1073759 – Molded Viton Aftercooler seal (release date 4/06)
