Specify MDP Sealing Products

3500 Series Engines

Engineered Reliability for Extended Performance

Magnum Diesel Parts provide high quality gasket and sealing products engineered for performance and extended reliability.

With hundreds of molded seal applications used in today's engines... Magnum Diesel Parts give rebuilders the right materials and the precision fit needed to perform beyond customer expectations in these demanding applications.

Magnum's strong expertise with precision molded rubber products, balanced with an extensive knowledge and use of U.S. manufactured premium material compounds result in better sealing and dependability.

MDP's use of premium grade materials and comprehensive finished product inspection insures customers experience extended trouble free engine sealing.

Rebuilders who are serious about the quality of the rebuild can depend on Magnum Diesel gasket kits for seal integrity.
